1935-1940 Frame and Suspension Parts

1935-1940 Frame and Suspension Parts

REPLACEMENT X-MEMBER KIT

Formed channel X-member gives excellent rigidity for fiberglass or steel bodies. Ideal for open cars but works well under closed cars too. Fits stock or repro frames. Kits have room for most engine combinations. Will fit under stock bodies but is not an exact stock replacement. X-member is opened up for transmission clearance. The front of the X is angled. Floor pan will bolt down like stock. Two side braces replace stock items, not included with kit. Requires a Chassis Engineering brake pedal. Note: recommended for experienced builders only.

- AT-2036 X-rails \$325.00
- ES2140 Center transmission mount, Chevy 350-etc. \$115.00
- ES-2141 Side braces from frame to Chassis Engineering X-member center. \$70.00

1935-1940 Brake and Suspension Parts

1935-1940 Front Suspension Parts

ON ALL AXLES, SPECIFY 2" OR 2 1/2" AXLE BOSS

DROPPED FRONT AXLES

Chassis Engineering forged I-Beam axle is 47" between King Pin centers and is narrower between perch bolts. Requires special main leaf. We recommend this axle when putting a dropped axle in a 1935-40 Ford. Use the 1937-40 wishbone because the 1935-36 is wider and will interfere with the tires when turning.

- AU-2107** Vintage I-Beam \$375.00
- Special main leaf..... \$50.00
